Consumer units UK500 Complete version and basic version

Consumer units UK500N - flush-mounted consumer units

Complete version with trim frame and door

IP30, $ext{ } ext{ } ext{$

Consumer unit DIN VDE 0603-1, DIN 43871

Available in 1 up to 4 row versions as flush-mounted consumer units

Upgradeable for hollow-wall mounting using UZ90P4

Wall box:

- non-warp, break-proof, non-flammable, low-halogen plastic
- with cable strain relief comb
- with detachable cable inlets

Wall grips

Removable device support

With N/PE Quick-terminals

Cover with 90° quick-action screws, lead-sealable,

45 mm slots for 12 devices, expandable to 14

Labelling system

Trim frame and sheet steel door, adjustable for uneven surface,

colour: white, RAL 9016

Consumer units UK500BN - flush-mounted consumer units

Basic version without trim frame and door

IP30, riangle, $extstyle \psi^*$, riangle, up to 63 A

Consumer unit DIN VDE 0603-1, DIN 43871

Available in 1 up to 4 row versions as flush-mounted consumer units

Upgradeable for hollow-wall mounting using UZ90P4

Wall box:

- non-warp, break-proof, non-flammable, low-halogen plastic
- with cable strain relief comb
- with detachable cable inlets

Wall grips

Removable device support

With N/PE Quick-terminals

Cover with 90° quick-action screws, lead-sealable,

45 mm slots for 12 devices, expandable to 14

Door "art line" for UK500 series Elegance at the heart of your home

art line

Functional yet elegant - here's a perfect example of how easy it can be to combine these essential features.

Beautiful and perfectly formed -"art line" model with its brushed stainless steel is an embodiment of the design principle based on reducing things right down to the essentials.

The "art line" ennobles the UK500 version. "art line" opens the door to a new world of aesthetics in consumer unit design and has already become a classic in its own right.

Brushed stainless steel

Door "addition line" for UK500 series An eye-catching focal point or your individual interior design

addition line

The "addition line" series of picture frames is quite literally as pretty as a picture. You would never believe that these high-quality ornamental items conceal a technical product.

Whether in brushed aluminium or in white colour, no other solution offers more individuality and flexibility for matching personal taste and décor.

White

Brushed aluminium

Door "colour line" for UK500 series A decorative touch to lend personality to your space

colour line

"Colour line" gives a splash of colour to the functional and aesthetic lines of the standard trim frame and its door. The coated versions, available in the colours light grey, silver and anthracite, open up whole new creative possibilities for consumer units.

Silver RAL 9006 Light grey RAL 7035 Anthracite RAL 7016

Door "vision line" for UK500 series To provide an aesthetic insight into the consumer units

vision line

The transparent doors for the UK500 consumer unit series have been further developed and optimised. Aesthetic and monolithic they offer a maximized view to the interior of the UK500.

The high quality models of impact resistant, high gloss polished plastic with a blue-grey shade, are glow wire tested up to 850°C.

Its self extinguishing polycarbonate material has a very high mechanical impact strength (IK 08), and being colourfast, offers an optimal view with signal lamps for example. A visual inspection of the status of individual devices is possible without opening the door.

Media enclosures "media line" Communications and multimedia technology at a glance

media line

The rapid development of new communications and information technologies means that ever more media and communication devices are to be found in homes. Hardly anyone wants to do without the benefits that technology offers. A structured cabling arrangement is thus indispensable for a future-proofed and well-ordered installation.

The new media enclosures help you achieve this goal. You have all your media applications at a glance with the central assembly of media and communications technology in distribution cabinets.

Flush-mounted wall box with perforated sheet steel mounting plate and a DIN rail

Doors with ventilation holes RAL 9016 (accessory) For other design doors, see page 1/22

Consumer units with "tech line" control panel Intelligently taking functional aesthetics to the next level

tech line

Thanks to the "tech line" control panel, the UK500 series consumer units offer that extra bit more. The monitoring and operation such as the control of lighting systems is taken care of by the control panel. In a way that's both easy-to-view and decorative. The control panel can be finished by the user or supplied already wired and printed by the factory.

Consumer units UK500 Mounting

Installation - uncompromisingly simple, quick and well thought-out

The wall grips, included as standard, have a dual purpose. On the one hand, they allow the mounting in two additional depths. On the other, they can be used as spacers where several consumer units are to be placed side by side.

The removable cable inlet allows easy insertion of incoming and outgoing cables and uses a quick, singlehand-operated push-and-stay design.

Simple push-and-stay technology and all-round ease of installation

The wall box is non-warp, non-breakable and non-flammable. It offers a large wiring space. The strain-relief comb for neat cabling is an integral part of the wall box.

There are ample further preformed cable entry points on the sides and back of the wall box.

The device support can be snapped in and is installed quickly without tools. Here too, a variety of common installation techniques have been catered for - the device support can also be fixed in position using screws. The DIN rail is doubleinsulated as standard in all variants.

Professional cable entry in the wall box. Cable strain relief comb.

Consumer units UK500 Mounting

If required, the slots in the cover can be extended from 12 to accommodate 14 devices. The cover is fixed into position by two 90° quick-action screws which can be sealed.

All UK500 series consumer units are suitable for hollow-wall mounting. To do this, you only need the UZ90P4 hollow wall mounting set. No special hollow wall consumer unit is required. Upgrading is incredibly simple - just as easy as the hollow-wall mounting itself.

No screws, yet nothing can slip. Fastening is as easy as fastening cable ties. The hollow wall set can also be released if needed. The pull-strap will be twisted off after the work is completed.

Trim frame and door are easy to remove. Adjustable for uneven surfaces, sealable cover with 90° quick-action screws.

The quickest way for hollow-wall mounting

The hollow-wall set is placed inside the consumer unit.

- 1. Turn the tab to put the wall grip into position.
- 2. Then just pull
- 3. and it's done.

Delivery options UK500 series Complete consumer unit / Hollow-wall mounting set

The complete version UK500N with trim frame and door

Wall box with device support, wall grips, removable DIN rails, cover, trim frame, door, N/PE Quick-terminals and labelling system.

Media enclosure complete version UK500MV with trim frame and door with ventilation holes

Wall box with perforated sheet steel mounting plate, wire holders, DIN rail, wall grips, double socket with euro-plug insert, trim frame and door with ventilation holes.

Consumer unit with control panel FPT500 with trim frame and aluminium control panel

Wall box with device support, wall grips, removable DIN rails. Aluminium control panel unprinted and unwired. The control panel can be finished by the user or supplied already wired and printed by the factory. Control panels must only be mounted in vertical direction. Door hinged right.

Hollow-wall mounting set UZ90P4 All consumer units are designed and prepared for hollow-wall mounting

Wall boxes can be fitted with the UZ90P4 hollow-wall mounting set and are then ready for hollow-wall mounting.

Delivery options UK500 series Basic version and media enclosures / Design doors

The basic version UK500BN without trim frame and door

Wall box with device support, wall grips, removable DIN rails, cover, N/PE Quick-terminals and labelling system.

Media enclosure UZM500MV without trim frame and door

Wall box with perforated sheet steel mounting plate, wire holder, DIN rail and wall grips.

N/PE quick-terminals Standardised, future-oriented and flexible

Tidy and flexible installation

The N/PE Quick-terminals simplify your work: Just choose the right terminal blocks and plug them in!

Extremely flexible in terms of expandability, these N/PE Quick-terminals are unmatched for safe, efficient and future-oriented conductor connections.

Product benefits

- Flexible terminal system for several N power circuits:
 Screw connections: 2.5 to 25 mm² with steep conductor;
 up to 25 mm² with flexible conductor with sleeve;
 spring terminals: 1.5 to 4 mm² with steep conductor; 2.5 mm² with flexible conductor with sleeve
- Optimal when using several residual current circuit breakers (RCDs)
- Ease of expansion using connecting bridges
- Precise assignment of the terminal blocks (clear colour coding:
 N = blue, PE = yellow-green)
- Easy labelling of the terminals (DIN VDE 0603 Part 1) using pre-printed, self-adhesive number strips
- Wide range of applications: can be used with the UK500 and A300 consumer unit series, in all compact distribution boards, and with all meter-, wall-mounting and floor-standing cabinets.

DIN VDE 0603-1, DIN 43871	
DIN rail spacing 150 mm	
Colour: white, RAL 9016	
Modular enclosure with connecting parts	
N/PE quick rails must be ordered separately	

The modular consumer units from STRIEBEL & JOHN are ideally suited to realize object-based combinations of consumer units. The basic enclosure Al10N with its cable inlets and the modular enclosure Al11N with the connection parts offer 12 space units respectively and can be assembled at a flick of the wrist.

The consumer units can be extended at any time by adding another modular enclosure. The cable inlets with numerous knockouts for cables and conduits and additional knockouts at the sides and back ensure neat cable arrangements. The DIN rail spacing of 150 mm facilitates the connection of incoming and outgoing cables.

The pluggable N and PE rails are selected according to the number of cables and can be fastened to the top or bottom or also between rows.

The devices are protected by a transparent flap cover and are mounted to the device carrier rail that can be fastened to three common device widths.

The A300 by STRIEBEL & JOHN is well known by those who modernise and renovate old buildings. This practical and versatile hood-type consumer unit is ideally suited for wall-mounting assembly. It is not only quick and easy to assemble, but the timeless design ensures that it also fits harmoniously into any environment.

The basic enclosure with one-piece rear is made of robust plastic and is very durable. Thanks to the freely positionable N/RCDterminal block, pre-printed lead-in for cable conduits, comfortable expansion to the top, bottom or sides, the A300 is extremely easy to install. The enlarged upper connection space on the 2, 3 and 4-row models, as well as the time-saving snap-in device support, make work on the consumer unit even easier and more comfortable.

Specially designed accessories and spare parts guarantee that the A300 will be a flexible and reliable partner for the renovation and modernisation of old buildings as well as new premises.

N/PE quick-terminals Standardised, future-oriented and flexible

Tidy and flexible installation

The N/PE Quick-terminals simplify your work: Just choose the right terminal blocks and plug them in!

Extremely flexible in terms of expandability, these N/PE Quickterminals are unmatched for safe, efficient and future-oriented conductor connections.

Product benefits

- Flexible terminal system for several N power circuits: Screw connections: 2.5 to 25 mm² with steep conductor; up to 25 mm² with flexible conductor with sleeve; spring terminals: 1.5 to 4 mm² with steep conductor; 2.5 mm² with flexible conductor with sleeve
- Optimal when using several residual current circuit breakers (RCDs)
- Ease of expansion using connecting bridges
- Precise assignment of the terminal blocks (clear colour coding: N = blue, PE = yellow-green)
- Easy labelling of the terminals (DIN VDE 0603 Part 1) using pre-printed, self-adhesive number strips
- Wide range of applications: can be used with the UK500 and A300 consumer unit series, in all compact distribution boards, and with all meter-, wall-mounting and floor-standing cabinets.

IP40 💷

Colour: RAL 7035

With N/PE rail

For those devices that do not need too many space units, STRIEBEL & JOHN offers the best solution with its flush-mounted compact consumer units. They are suited for single houses, flats, commercial buildings and hotels and can perfectly be integrated into beautiful environments.

Due to its compact dimensions, the unit can also be easily integrated to smaller niches. The rugged plastic enclosure offers the IP30 degree of protection and has several knockouts for the insertion of cables from the top, the bottom, the sides or the rear face. The door fitted with the compact consumer units can easily be switched from right to left hinge joints.

Surface-mounted hood-type consumer unit AN

IP300

Colour: White, RAL 9010

Surface-mounted hood-type consumer units with rear wall, without door

With N/PE rail

AN hood-type consumer units are the smallest units of the product range from STRIEBEL & JOHN. They are especially suited to additionally secure individual cables or circuits.

The ease of wall-mounting makes them also ideal for all renovation applications. The reliable touch guard with 90° quick-action screw offers knockouts for tidy cable arrangements.

AN hood-type consumer units are available in two enclosure sizes - with five or eight space units.
